Disc Eraser™

Prevent Data & ID Theft - HIPAA compliant

*For users who require secure disposal of CDs, CD-Rs, and DVDRs, the **Disc Eraser** is an environmentally-friendly and affordable alternative to heavy-duty CD shredders. The Disc Eraser provides a safe, simple, and secure way to protect your data, while promoting the recycling of unwanted discs, through the use of revolutionary Optical-Strip Technology.*

Identity Theft is a serious problem!

- Identity theft crimes cost U.S. victims \$48 billion dollars in 2008. Identity theft is the fastest growing type of crime in the United States – with more than 30 million victims in the past five years.

Shredders are noisy and dangerous!

- From January 2000 through September 2005, the Consumer Product Safety Commission (CPSC) received over 50 reports of injuries and amputations from paper shredders, most involving children younger than five. As a result, the CPSC has issued a Paper Shredder Safety Alert, and it has started working with shredder manufacturers to establish new product safety standards.

Shredders produce hazardous E-waste!

- Due to the difficulty of sorting and handling shredded or broken CD fragments, many CD Recycling facilities accept whole discs only. Current methods of disc shredding & destruction produce E-waste instead of permitting the recycling of discs.
- Over 7 million tons of E-waste has been estimated to fill U.S. landfills by 2010. E-Waste has become one of the fastest growing sectors of the country's solid waste stream, contributing as much as 40 percent of the lead in U.S. landfills, as well as cadmium, mercury and other hazardous materials that could potentially leak into groundwater and endanger public health and the environment.

The Disc Eraser offers a better solution!

- The Disc Eraser is a “precise alignment tool” that imparts an optical-strip through all regions on a disc (Lead-in, Lead-out, & Data regions), to render it unreadable, with one quick swipe. The Disc Eraser disables optical discs, making the contents unrecoverable, without breaking or shredding the discs. As a result, the discs are safer to handle and sort, and can be fully recycled by CD recycling facilities.

Works on ALL types of Optical Discs!
