CD Recycling Center  
of America

# Disc Eraser™

Prevent Data & ID Theft - HIPAA compliant

Simply open, and align disc with center hub.

Close, push down firmly, and pull the slider quickly.

Your disc is now unreadable, and ready for recycling!

## Secure Data Destruction

Scratching and marking is NOT secure! The Disc Eraser uses Optical-Strip technology to render discs unreadable and unrecoverable.

## Portable & Affordable

The Disc Eraser is small enough to fit in your pocket, and is far more cost-effective, easier, and safer to use than a CD shredder.

## 100% Safe - No Breaking

Destroying discs by cutting, breaking, or microwaving (toxic) is dangerous, and shredders have caused over 50 reported injuries since 2000.

## Promotes Recycling

Due to the difficulty in sorting and handling disc fragments, whole discs are preferred by most CD recycling companies. Therefore, shredding, cutting and breaking produces E-waste.

Why shred?

Recycle instead!

COMPACT  
disc

DVD

HD DVD

Blu-ray Disc

Works on ALL types of Optical Discs!
